1. The following is an examiner's statement of reasons for allowance:

References Tennen et al (US 6,801,621), Brady (US 6,034,909) and Tomishima et al (US 5,822,264) are cited because they are pertinent to the method and apparatus for communicating over transmission line comprising modem. However, none of the cited references teaches or suggests a communication apparatus comprising, in combination, the arrangements of a semiconductor DAA having a line control unit connected to a communication line network and a serial IF unit connected to the line control unit via an isolating circuit, the semiconductor DAA controlling the communication line network and transmitting and receiving data; a modem for modulating and demodulating the transmitted and received data; and a system unit for controlling the semiconductor DAA and the modem, and especially, wherein: the line control unit includes a line current detector for detecting a line current, and a line voltage detector for detecting a line voltage; and the system unit obtains line impedance based on the line current and the line voltage, and adjusts a transmission level of the modem in accordance with the obtained line impedance as recited in claims 1 and 5 and the corresponding method claim 9 and further limitations of the dependent claims 2-4 and 6-8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
